

# PEM-C520

## PEM CONVERTING SYSTEM

Fully automated converting line designed for highly sensitive materials and membrane technologies such as CCM, Anode, Cathode ...

### Features

- Linerless processing
- Slitting tool
- AOI
- Web Width Measurement
- Rewinder – Web Tension Control
- MES Interface

### Areas of application

Fully automated converting line for gently rewinding sensitive materials, precisely converting mother rolls into smaller rolls, or removing defective areas after web surface inspection.

- Automotive industry: fuel cell, battery
- Energy and heating technology: electrolyser, fuel cell
- Medical technologies: membrane processing
