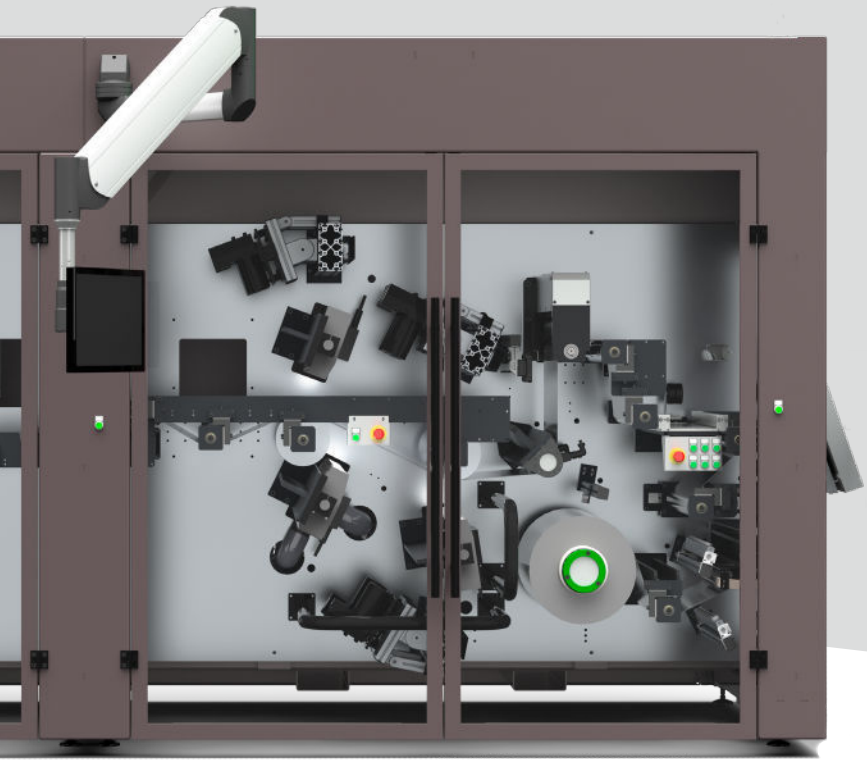
PEM-I520

PEM INSPECTION SYSTEM

Fully automated testing line designed for highly sensitive materials and membrane technologies such as CCM, MEA, Anode, Cathode, ...



Features

- Linerless processing
- AOI
- Layer Thickness Measurement
- Defect Marking – Inkjet, Laser
- Contactless Velocity Measurement
- MES Interface

Areas of application

Fully automated testing line for the development of higher quality standards and validation of testing equipment through precise material testing and surface inspection.

- Automotive industry: fuel cell, battery
- Energy and heating technology: electrolyser, fuel cell
- Medical technologies: membrane processing
